PROFESSIONAL SUMMARY

Dan Bellamy is an artistic developer & designer with over 4 years of experience building apps and websites for brands, startups, entrepreneurs and businesses looking for change. My journey made me a keen problem solver with an ability to adapt quickly and apply previous experiences to craft the best solutions yet.

PROJECTS

Hayley Studio

<https://hayleystudio.webflow.io>

- Designed and launched a website for an interior design firm that showcased client projects and highlighted the firm.
- Conducted user research and usability testing to identify pain points and opportunities for improvement.
- Collaborated with an architect to ensure the right designs were implemented accurately and efficiently.

Funky Clouds

github.com/Bellamy01/funky-clouds

- Developed a cross-platform weather app using React Native and Expo tools to provide current and upcoming weather information in a 5-day forecast.
- Successfully integrated the OpenWeather API into the app to access real time user data based on the user's location.
- Designed a simple yet user-friendly interface for Funky Clouds through high quality images and icons.

Jubilant CMS

github.com/Bellamy01/jubilant-cms

- Developed and designed, a full-stack blog web application in Next.js with a real-time content management system through Sanity and leveraged GROQ queries for server actions.
